ASOS Chemical Policy, Restricted Substances List

for all ASOS own brands

These are brands and labels where ASOS is responsible for design and/or production.
These are:

- ASOS Design
- ASOS Luxe
- ASOS Edition
- ASOS 4505
- ASOS Collective
- ARRANGE
- Collusion
- Reclaimed Vintage
- Topshop
- Topman
- Miss Selfridge
- Weekend Collective

1. Introduction

For ASOS, 'Fashion with Integrity' means managing all aspects of our business transparently and appropriately. We want our customers to enjoy their fashion secure in the knowledge that, when buying from ASOS, they are buying from a responsible company that is actively working to deliver fashion with both integrity and respect for people, animals and the environment, on a sustainable long-term basis.
'Fashion with Integrity' therefore encompasses the chemicals that are used in any aspect of our products, our fabrics, our components, and our packaging.

2. **Policy detail**

POLICY STATEMENT

Eliminate Harmful Chemicals
As ASOS continues to build its sustainability commitment, we aim to reduce environmental impact and eliminate the use of harmful chemicals to protect worker/consumer health and the environment.

Compliance to Global Legislations
ASOS has developed a Restricted Substance List (RSL), which outlines the acceptable limits of potentially toxic or harmful substances which can be present in finished products. This RSL has been developed to comply with legislative and regulatory requirements of global trading territories ASOS sells within, including REACH and Proposition 65. ASOS expects all our suppliers (including brands) to supply products that comply with applicable global legislative and regulatory requirements and take responsibility for keeping up to date with any legislative changes. Suppliers should be risk-assessing all materials and product for compliance as part of product development process. All of ASOS' suppliers are required to adhere to all applicable laws and regulations of the regions in which they operate.

Industry Collaboration
Chemical compliance and safer chemistry can be over whelming, and we cannot do it alone. We commit to working with our supply chain, industry associations and leaders to accelerate industry efforts towards safer, sustainable chemistry inputs, processes, and outputs.
ASOS is a signatory brand of ZDHC and requires all our own brand suppliers to share ZDHC requirements down the supply chain; ZDHC MRSL, Wastewater guidelines, Chemical Manufacturing System and Technical Industry Guide.
Link to all of these can be found on our Chemical APP.

RSL (RESTRICTED SUBSTANCE LIST) OVERVIEW

The ASOS RSL;

a) Applies to all fabrics, components, products and packaging.
b) Details the global requirement for restricted substances and respective limits in finished goods. For some high risk materials we require mandatory testing to be submitted per order.
c) ASOS accepts alternatives to testing demonstration of compliance; Oeko-tex, Bluesign.
d) If you become aware that any Product(s) may or do contain any restricted substance(s), please notify ASOS immediately - chemicalmanagement@asos.com and your retail/technical contact.

ACTION FOR SUPPLIERS

ASOS requires suppliers to ensure all products and packaging meet the limits set out in our RSL. To ensure compliant product, suppliers must:

a) Communicate our RSL (this policy) and ZDHC's MRSL (Manufacturing Restricted Substance List, please use this link to ZDHC website MRSL) upstream to material, component and chemical suppliers.
b) Source materials/components responsibly at development/order stage by requesting declarations, recognised certifications and/or test reports from your suppliers showing compliance to our RSL and ZDHC MRSL.
c) Map material/component sources to establish compliant sources.
d) Test materials/components for high-risk chemicals and submit mandatory chemical testing to your technologist prior to Gold Seal Approval.
e) Highlight any non-conformance with our RSL prior to starting production/delivery.
f) Respond swiftly to ASOS' request to see evidence of compliance in cases of customer complaints or enforcement authority challenge.
g) Follow ZDHC CMS (Chemical Management System) and TIG (Technical Industry Guide) to implement better chemical management practices.
h) Suppliers who carry out wet processing are asked and encouraged to complete ZDHC Performance InCheck, Verified InCheck, Clear Stream reports, (including Supply to Zero certification level 1 & 2), to evaluate and monitor the chemicals used in production.
i) Suppliers who produce MMCF fabrics must follow and undertake the ZDHC MMCF module, please read (depending on the reporting year) the ZDHC MMCF Guidelines V2.2 and ZDHC MMCF Guidelines V3.0. Relevant stakeholders are to adopt and implement. Please read the ZDHC MMCF Implementation V3.0 document.
j) All suppliers on the ZDHC program, are to follow ASOS ZDHC Standard Operating Procedure (SOP). This can be found on the supplier extranet.

BRAND/SUPPLIER ACTION ON CHEMICAL FAILURES

As soon as the brand/supplier becomes aware of any product that may not comply with the ASOS RSL they must notify ASOS immediately. Providing evidence of compliance and product information required. The brand/supplier must co-operate with all reasonable requests to provide such information as necessary to demonstrate evidence of testing and product compliance.

DEALING WITH COMPLAINTS AND ENFORCEMENT AUTHORITY CHALLENGES

In the event that:

a) ASOS receives notice that it has resold a product supplied by you that does not comply with our RSL; or
b) ASOS carries out testing on your product and determines a failure to comply with our RSL; or
c) ASOS receives a complaint from our customer,

we will take steps to immediately withdraw the Product from further sale.

ASOS ACTIONS ON CHEMICAL FAILURES

ASOS will not accept products, which fail to comply with our RSL and reserves the right to:

a) Reject non-compliant products and require a replacement with compliant products.
b) Require re-working of the products to comply with the ASOS RSL.
c) Test and/or conduct a product recall.
d) Cancel any undelivered order/s.
e) Discount / price reduction of delivered orders.
f) Apply service credits,
g) Apply monetary deductions including but not limited to covering the cost of paying fines to an enforcement authority.
h) Account for any lost profits incurred by ASOS including but not limited to as a result of a product recall and making goodwill payments.
i) Destroy or safely dispose of products (at supplier's cost).
j) Reject stock (supplier to arrange and pay for the cost of storage and collection).
k) Recover associated costs from suppliers.

water repellant treatment See Footnote 1 & 3	-	water repellant treatment	Only BIONIC ECO from RUDOLF (Rudolf.de) can be used for Bestseller garments. Other non-fluorinated treatments are only allowed in special cases and requires specific approval from Responsible Sourcing (Chemical responsible) ASOS brands suppliers can only use fluorinated Free treatments. (PFAS Free/Perfluorochemicals)	-
Functional treatments (besides water repellency) See Footnote 1	-	Functional treatments (besides water repellency)	A possible functional treatment besides the WR described above requires specific approval from Responsible Sourcing (Chemical responsible)	-
Odour (for PU products) See Footnote 1	-	Odour	A non-product specific odour will be treated as a quality issue – and even if the style is meeting the RSL, products classed as 4 or 5 will be rejected.	SNV 195651
